1a238 Calcium formate: 400 000 mg/kg

**TECHNOLOGICAL ADDITIVES
PRESERVATIVES:**

VITAMINS
3a671 Vitamin D3: 233 000 IU/kg

NUTRITIONAL ADDITIVES
26 g of calcium and 8 g of phosphorus
EACH BOLUS CONTAINS

Administer with a suitable bolus applicator.
Do not administer to an animal laying down.
Store dry, free from frost and high temperatures,
and out of reach of children.

Calcitop is fast dissolving calcium supplement that is
given to dairy cows from calving until two days after
calving.

STORAGE & ADMINISTRATION

APPLICATION

DOSAGE

2 boluses immediately after calving
1 or 2 boluses 10 to 12 hours after calving
1 or 2 boluses 24 hours after calving

The option of a nutrition expert or veterinarian
should be sought before using the feed or
before extending its period of use.

Provides additional calcium where dietary
sources may be low or insufficient to meet the
animal's normal requirement. This may support
the reduction of the risk of subclinical milk
fever/hypocalcaemia.

Stressless farming
