

WARNING KEEP OUT OF REACH OF CHILDREN - For Animal Treatment Only

COMBINATION PLUS TAPE DRENCH FOR SHEEP

A broad spectrum sheep drench for the control of tapeworms (heads and segments), adult liver fluke and susceptible gastrointestinal roundworms and lungworm in sheep and lambs including benzimidazole and levamisole resistant strains. Also provides short-term mineral supplementation.

INGREDIENTS: Albendazole 25 mg/mL, Levamisole HCl 37.5 mg/mL Praziquantel 18.8 mg/mL, Selenium 0.5 mg/mL, Cobalt 0.2 mg/mL, Copper 2 mg/mL, Zinc 0.6 mg/mL, Iodine 1mg/mL

NET CONTENTS: 10 Litre

LCPTDS10/03

COMBINATION PLUS TAPE DRENCH FOR SHEEP

WARNING: Dangerous to the environment. Very toxic to aquatic organisms and harmful to the soil environment. Avoid release into the environment and contamination of any water supply with product or empty container.

PLEASE READ LABEL COMPLETELY BEFORE USE

HANDLING PRECAUTIONS: May be harmful if swallowed. Handle with care avoiding skin contact. May cause mild skin irritation. Repeated exposure may cause skin allergy. Albendazole and levamisole hydrochloride may possibly cause damage to genetic material and may affect development and/or reproduction. Levamisole hydrochloride may possibly affect blood and haemopoietic system.

PRECAUTIONS: Do not use at the same time as any other selenised fertiliser, prill or product without consulting a veterinarian. Do not exceed stated dose or dose more frequently than three weekly. In sheep, liver levels of copper may be quite variable. Consequently, there is always a risk of copper poisoning (deaths) occurring following copper supplementation in this species. Doses of 3 or more times those recommended can cause symptoms of levamisole toxicity so estimate liveweights carefully. Dehydrated animals may be more susceptible to toxicity. Fatal interactions may occur between levamisole and organophosphate dips.

FIRST AID: If swallowed, Do NOT induce vomiting. For advice, contact a doctor or the National Poisons Centre 0800 POISON (0800 764 766) immediately. If skin or hair contact occurs, remove contaminated clothing and wash skin thoroughly. If splashed in eyes, flush immediately with copious amounts of water.

INDICATIONS: Combination Plus Tape Drench for Sheep contains albendazole 25mg/mL (a member of the benzimidazole family), levamisole HCl 37.5mg/mL (an imidazothiazole derivative), praziquantel 18.8mg/mL (a pyrazinisoquinoline derivative), selenium 0.5mg/mL, cobalt 0.2mg/mL, copper 2mg/mL, zinc 0.6mg/mL, iodine 1mg/mL. For the treatment of tapeworm (*Moniezia expansa*) heads and segments in lambs and sheep. For the treatment of the following susceptible immature and mature (*includes inhibited L4) gastrointestinal roundworms and lungworm, including benzimidazole and levamisole resistant strains: *Haemonchus contortus**, *Teladorsagia (Ostertagia) circumcincta**, *Trichostrongylus axei*, *Cooperia curticei**, *C. punctata**, *Trichostrongylus colubriformis*, *Oesophagostomum venulosum* (adults only), *Nematodirus filicollis* (adults only), *N. spathiger*, (adults only), *Dictyocaulus filaria*. For the treatment of adult liver fluke (*Fasciola hepatica*).

RESISTANCE MANAGEMENT: Resistance can develop to any anthelmintic. Ask your local animal health advisor or veterinary practitioner for recommended parasite management practices for your area to reduce the development of resistance. It is advised that a resistance test be carried out regularly when using any parasite treatment.

DIRECTIONS FOR USE:

By law the user must take due care, obtaining expert advice when necessary, to avoid unnecessary pain and distress when using this product other than as directed on the label.

Shake well before use. Combination Plus Tape Drench for Sheep is a ready to use anthelmintic that can be dosed through standard drenching equipment. It is important to give the correct dose. Therefore, before treatment, weigh a representative sample of sheep to determine the weight of the heaviest animal. Where there is a large variation in liveweights, drafting into two or more lines may be appropriate before weighing and treating, to avoid under and overdosing. In this situation it is important to choose the dose rate based on the label recommendation for each weight band. Use correct drenching techniques and check accuracy of drenching equipment regularly. Wash out drench gun thoroughly with water before and after use.

DOSE CHART: Dose rate sheep: 1mL/5kg (5mg/kg albendazole, 7.5mg/kg levamisole HCl and 3.76mg/kg praziquantel, 0.1mg/kg selenium, 0.04mg/kg cobalt, 0.4mg/kg copper, 0.1mg/kg zinc, 0.2mg/kg iodine).

ANIMAL WEIGHT	DOSE	NO. OF DOSES PER 10L PACK
15 kg	3 mL	3333
16-20 kg	4 mL	2500
21-25 kg	5 mL	2000
26-30 kg	6 mL	1666
31-35 kg	7 mL	1428
36-40 kg	8 mL	1250
41-45 kg	9 mL	1111
46-50 kg	10 mL	1000
51-55 kg	11 mL	909
56-60 kg	12 mL	833
61-65 kg	13 mL	769
66-70 kg	14 mL	714

Over 70 kg dose at the rate of 1 mL/5 kg.

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.

WITHHOLDING PERIODS

Meat: Sheep producing meat or offal for human consumption must not be sold for slaughter either during treatment or within 10 days of the last treatment.

Milk: Milk intended for sale for human consumption must be discarded during treatment and for not less than 35 days following the last treatment.

STORAGE: Store in original container, tightly closed, in cool, dry conditions. Protect from light. Store below 25°C and avoid temperatures below 0°C.

DISPOSAL: Preferably dispose of product by use. Otherwise dispose of product and packaging at an approved landfill or other approved facility.

EMERGENCY RESPONSE: In case of spillage, wear appropriate protective clothing and prevent material from entering water ways. Absorb spills with inert material and place in waste containers. Wash area with water and absorb with further inert material. Dispose of waste safely.

EPA approval number HSR001919. See www.epa.govt.nz for approval conditions. Registered pursuant to the ACVM Act 1997, No. A9871. See www.foodsafety.govt.nz for registration conditions.
